GET YOUR DRIVERS HOME SAFELY

Help improve safety and travel reliability on I-80.
Take part in the WYDOT Connected Vehicle Pilot.
www.dot.state.wy.us
In one year alone, there were over 1,600 crashes on I-80 in Wyoming.

WYDOT is doing something about it. And your company and drivers can be part of the solution by participating in the Connected Vehicle Pilot. WYDOT is testing advanced technology that connects vehicles and infrastructure to better inform drivers and companies about driving conditions on I-80.

AS A PILOT PARTICIPANT, YOU’LL GET:

- Real-time road condition updates
- Work zone warnings
- Distress notifications
- Information on stopped vehicles ahead
- Parking assistance
- Hands-on or virtual training
- I-80 alerts and advisories for fleet managers
- Onboard equipment to broadcast safety messages and real-time warnings

Be a part of the future of safe driving.
